CDE2501 SUSTAINABLE SYSTEMS FOR LIVEABLE CITIES

SITE GUIDE FOR

PUNGGOL

AY 2025 – 2026 SEMESTER 2

Introduction to Site Guides

Welcome to Liveable Cities! Each of your teams will be working on a site from the following choices – Jurong, Woodlands, Punggol, Bras Basah-Bugis, Chinatown, Tampines and Queenstown.

To help you better navigate your site, we have created site guides to serve as starter packs to help you dive into your projects as quickly as possible.

We provide the following information for each site guide:

1. Maps marking the suggested boundaries of the sites
2. Prompts that spotlight key issues which you can apply to develop your project
3. A list of references to assist with your research

While we welcome you to use the prompts, you do not need to strictly adhere to them. Feel free to combine ideas from the prompts and/or explore other urban issues you are passionate about.

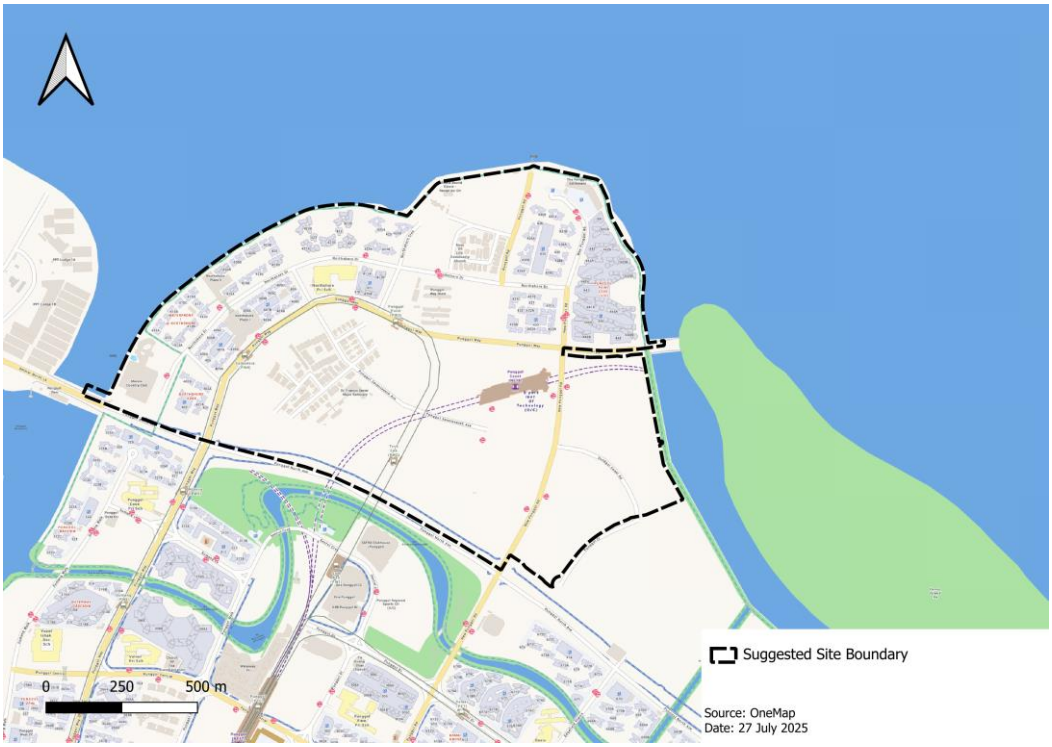
Note:
As you learn more about the site and discover what interests the team most, you can also choose to focus on a section of the site and/or extend the site boundaries a little to areas relevant to the issue you are studying.

Punggol

This site contains the following landmarks:

- New housing developments in Northshore that include new neighbourhood centres like Northshore Plazas I and II
- Punggol Digital District, which aims to integrate with a JTC business park focused on curating a digital technology cluster with the Singapore Institute of Technology (SIT) and nearby neighbourhoods to create a new model of a work-live-play-learn environment
- Transport nodes e.g. Punggol Coast MRT, Punggol Coast Bus Interchange
- Green spaces and recreational spaces e.g. Punggol Point Park, Punggol Promenade Punggol Point Walk

You can also consider exploring other potential areas in this site as well.



Prompts

- What teething issues does a new HDB estate like Northshore and Punggol North and/or new business park like Punggol Digital district face? How do HDB, JTC, and other agencies address these issues? What can be improved?
- How does Punggol achieve and maintain its vision to be an environmentally sustainable town? Are current measures enough? What more can be done?
- Is it important to locate business parks and higher education institutes further out from the CBD in residential estates like Punggol Digital District? How does Punggol Digital District contribute to Singapore's economic competitiveness? What more can we do to ensure Punggol Digital District achieves its vision?
- Do the amenities and infrastructure in Punggol adequately serve the needs of residents and businesses? How would you improve upon existing amenities?

Starter References

As you read the following references, think about:

- What are the intentions that URA and other government agencies have for Punggol?
- What are the strategies or interventions they are planning to make to achieve these intentions?
- Are these strategies or interventions sufficient to achieve these intentions?
- In the first place, are these intentions good for Punggol in helping it to achieve High Quality of Life, Sustainable Environment and Competitive Economy?

HDB's Punggol Town Design Guide: Punggol-Town-Design-Guide.pdf

The following two articles touch on how retail in HDB neighbourhoods has evolved. Punggol's neighbourhood retail options are more centralised in malls and neighbourhood centres rather than decentralised across the neighbourhoods. These articles may give you some context as to why that has happened, and what impacts it may have:
