CDE2501 SUSTAINABLE SYSTEMS FOR LIVEABLE CITIES

SITE GUIDE FOR

TAMPINES

AY 2025 – 2026 SEMESTER 2

Introduction to Site Guides

Welcome to Liveable Cities! Each of your teams will be working on a site from the following choices – Jurong, Woodlands, Punggol, Bras Basah-Bugis, Chinatown, Tampines and Queenstown.

To help you better navigate your site, we have created site guides to serve as starter packs to help you dive into your projects as quickly as possible.

We provide the following information for each site guide:

1. Maps marking the suggested boundaries of the sites
2. Prompts that spotlight key issues which you can apply to develop your project
3. A list of references to assist with your research

While we welcome you to use the prompts, you do not need to strictly adhere to them. Feel free to combine ideas from the prompts and/or explore other urban issues you are passionate about.

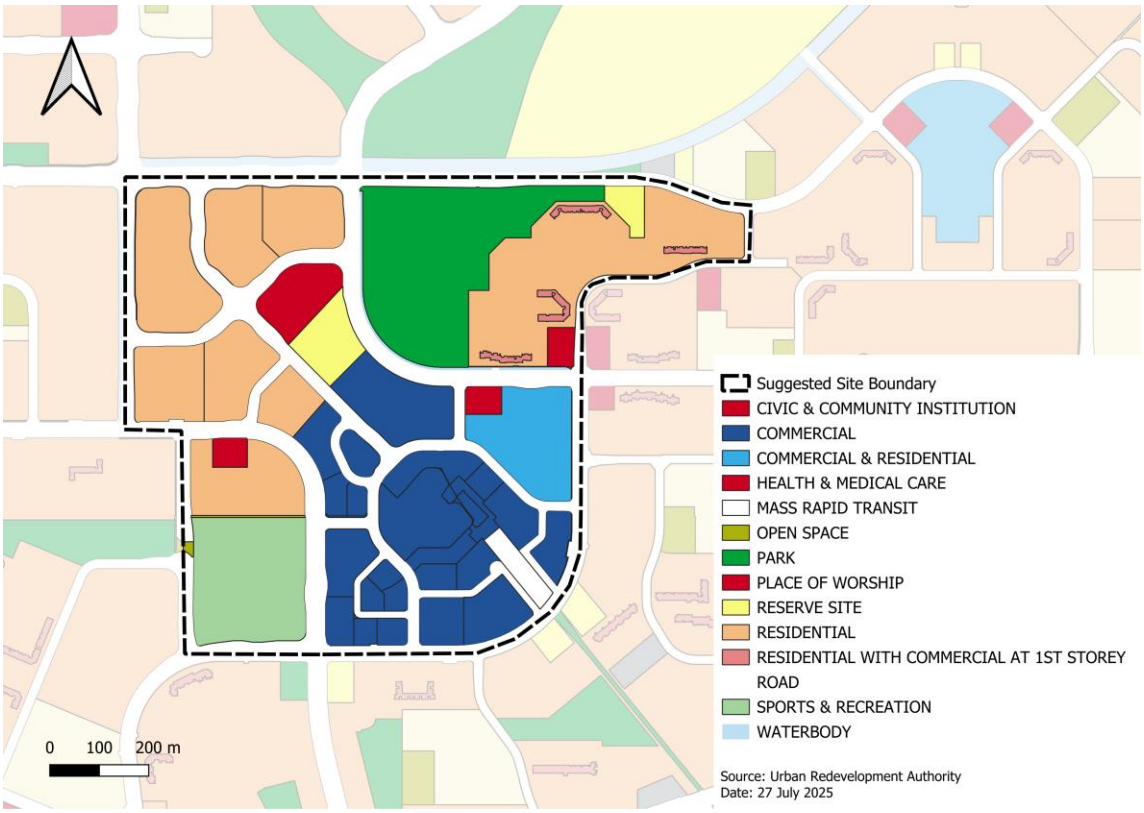
Note: As you learn more about the site and discover what interests the team most, you can also choose to focus on a section of the site and/or extend the site boundaries a little to areas relevant to the issue you are studying.

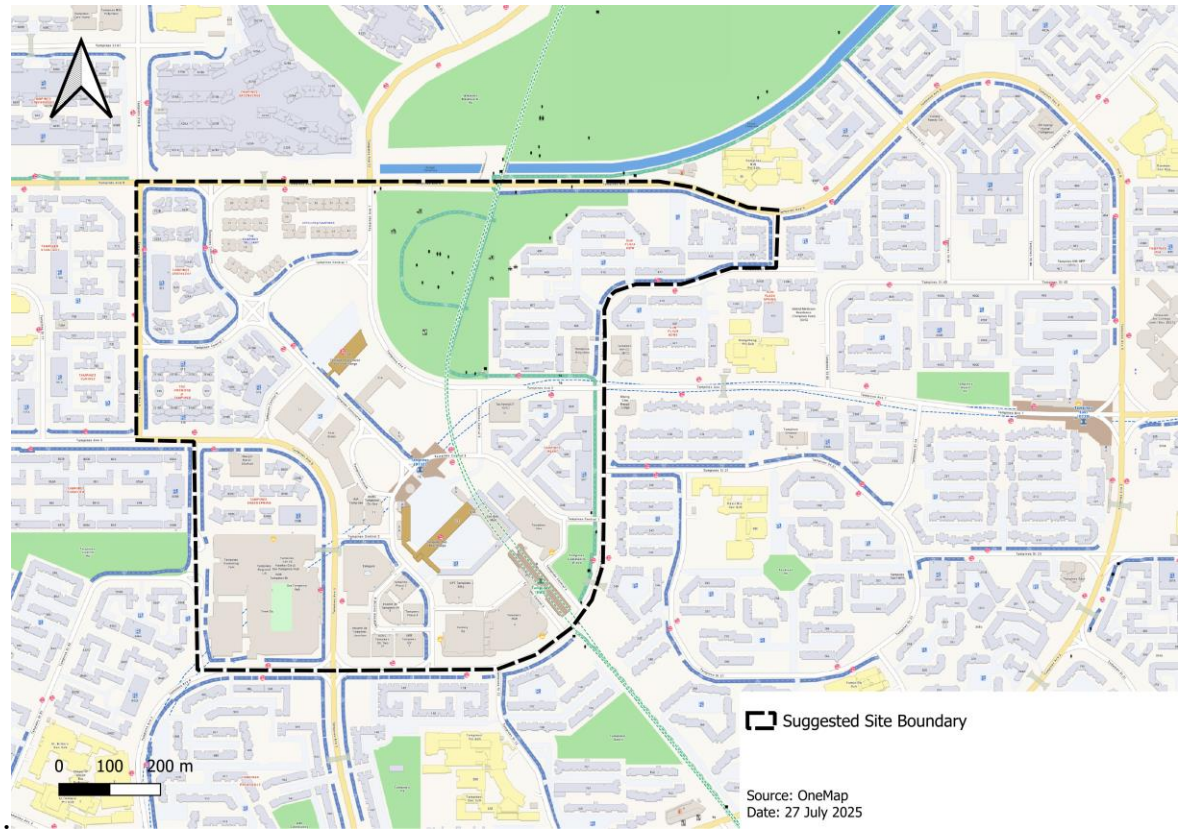
Tampines

This site contains the following landmarks:

- Retail e.g. Tampines Mall, Tampines 1, Century Square, Tampines Central Shopping Street
- Office/Business e.g. Tampines Plaza 1 & 2, Asia Green, OCBC Tampines Centre One, Telepark, CPF Building
- Neighbourhood Centre: One Tampines Hub (OTH)
- Green Spaces e.g. Sun Plaza Park
- Recreational Spaces e.g. Tampines Skate Park
- Transport Nodes e.g. Tampines MRT, Tampines Bus Interchange
- Residential areas e.g. HDB flats

You can also consider exploring other potential areas in this site as well





Prompts

- Tampines was the first regional centre built as a result of the decentralisation direction introduced by the 1991 Concept Plan. Why did Singapore decide to develop regional centres? Does Tampines Regional Centre meet the goals set out by the 1991 Concept Plan? What can we do to better meet these goals?
- Are neighbourhood centres still relevant in the age of malls and e-commerce? Would you keep them and how would you keep them viable?
- To what extent do parks and green spaces in Tampines support connections between residents/workers and nature? How can we improve on these connections?

Starter References

As you read the following references, think about:

- What are the intentions that URA and other government agencies have for Tampines?
- What are the strategies or interventions they are planning to make to achieve these intentions?
- Are these strategies or interventions sufficient to achieve these intentions?
- In the first place, are these intentions good for Tampines in helping it to achieve High Quality of Life, Sustainable Environment and Competitive Economy?

Tampines is home to several heartland areas that feature everyday coffee shops, general stores, mobile phone shops and medical clinics. In recent years, there have been increasing debates about whether these neighborhood centers will stand the test of time. The following links detail more information about this:
